

Unicorn: Cataloging Subfields and Spacing in Unicorn Bibliographic Records

Do not input spaces on either side of subfields when entering data in variable fields. Unicorn will translate the data correctly for display. (Do not confuse this with inputting spaces before punctuation). It is not necessary to enter subfield |a at the beginning of a variable field. You must enter any other subfield if it is the first subfield (e.g., 245 |k).

Examples:

100 1 Rice, Anne, |d1941-

110 1 Louisiana. |bDept. of Economic Development.

111 2 Workshop on Bayesian Robustness |n(2nd : |d1995 : |cRimini, Italy)
